Test Scenario	Test Case
Verify that user can select date	C01
Test that user can move Slider	C02
	C03
Test that user can expand/collapse accordion panels	C04
	C05
	C06
	C07
Test that user can submit practice form	C08

Verify that user can select grid elements	C09
	C10
	C11
Verify that user can sort list elements	C12
	C13
Test that user can see valid image	C14
	C15
Test that user can open page with valid link	C16
Test that user can click on buttons	C17
	C18
	C19
Test that user can select check box	C20
	C21
	C22

	C23
Test that user can validate dynamic properties	C24
	C25
	C26
Test that user can navigate to new tab via link	C27
Test that user can select radio button	C28
	C29
Test that user can submit text box with valid inputs	C30
	C31
	C32
	C33
Test that user can open browser windows	C34
	C35
Test that user can open modal dialogs	C36
	C37
	C38
	C39
	C40
	C41

Test case name	Priority
User can select date with date picker	High
User can move slider to the right	Medium
User can move slider to the left	Medium
User can open first accordian panel	Medium
User can open second accordian panel	Medium
User can open second accordian panel	Medium
User can open one panel at the moment	Medium
User can submit practice form with valid inputs	Critical

User can select one grid element   Medium

User can select all grid elements   Medium

User can deselect all grid elements   Medium

User can reposition first element in sortable list   Medium

User can reposition element through sortable list   Medium

User can see valid image   High

User can not see broken image   High

User can open page with valid link   Medium
User can not open page with valid link   Medium
User can double click on button   Critical

User can right click on button   Critical
User can click on button   Critical
User can select whole check box list while collap   Medium

User can deselect whole check box list while coll   Medium

User can select all check boxes by expanding list   Medium

User can deselect all check boxes by expanding l Medium

User can click on button after enabling and delay High

User can notice button color change after delay   High

User can see invisible button after delay   High

User can open valid link in new tab   Medium

User can receive API call for not found link   Medium
User can select yes radio button   High

User can select impressive radio button   High
User can not select no radio button   High
User can input valid data into text box and submit Critical

User can not submit text box with invalid Email   Critical

User can open new tab   High

User can close new tab   High

User can open new window   High
User can open new window message   High
User can open small modal dialogs   Medium

User can close small modal dialogs   Medium

User can open large modal dialogs   Medium
User can close large modal dialogs   Medium
